Framework Domains

Pillar 1 – Child Rights

Primary basis: UNCRC interpreted through General Comment No. 25, following the child-rights approach used by Atabey et al. (2025).

CR1. Education, development and access to appropriate information

Core concerns

- factual reliability and misleading information
- access to appropriate information
- age-appropriate information
- risks of GenAI interfering with or undermining educational experience
- communication of uncertainty and limitations

Relevant rights

- Article 6 / paragraphs 14, 15: Right to life, survival and development
- Article 17 / paragraphs 50-57: Access to information
- Articles 28, 29 / paragraphs 99-105: Right to education and goals of education

CR2. Equality, inclusion and accessibility

Core concerns

- discrimination and stereotypical treatment
- differential performance or treatment across groups
- accessibility
- cultural and linguistic inclusion
- consideration of children with disabilities and additional needs
- whether safeguards and benefits are available equitably

Relevant rights

- Article 2 / paragraphs 9-11: Non-discrimination
- Article 23 / paragraphs 89-92: Children with disabilities

CR3. Best interests, safety and wellbeing

Core concerns

- whether children's best interests appear to have been considered
- age-appropriate safeguards
- harmful or unsuitable content
- handling of sensitive or high-risk interactions
- design that may encourage inappropriate reliance, dependency or prolonged engagement

- protection from foreseeable harm

Relevant rights

- Article 3 / paragraphs 12, 13: Best interests of the child
- Article 6 / paragraphs 14, 15: Right to life, survival and development
- Article 19 / paragraphs 80-83: Protection from violence, abuse and neglect
- Article 24 / paragraphs 93-98: Health and welfare
- Article 31 / paragraphs 106-111: Right to culture, leisure and play

CR4. Privacy and protection from exploitation

Core concerns

- collection and processing of student/teacher data
- use of prompts and outputs
- use of data for model training or service improvement
- retention and deletion
- third-party sharing
- tracking and advertising
- privacy-protective defaults
- commercial use of educational data
- whether children can exercise meaningful privacy choices

Relevant rights

- Article 16 / paragraphs 67-78: Right to privacy
- Articles 32, 36 / paragraphs 40-42, 112-116: Protection from economic, sexual and other forms of exploitation

CR5. Agency, participation, transparency and remedy

Core concerns

- whether AI involvement is understandable to users
- whether information is communicated in an age-appropriate way
- meaningful user choice and control
- respect for children's evolving capacities
- ability to express views and exercise agency
- reporting and complaint mechanisms
- correction/deletion mechanisms
- ability to challenge decisions or problematic outputs
- information about rights and available remedies

Relevant rights

- Article 5 / paragraphs 19-21: Parental guidance and evolving capacities
- Article 12 / paragraphs 16-18: Respect for the views of the child
- Article 13 / paragraphs 58-61: Freedom of expression

- Article 14 / paragraphs 62, 63: Freedom of thought, conscience and religion
- Article 17 / paragraphs 50-57: Access to information
- Articles 40, 41 / paragraphs 43-49: Access to justice and remedies
- Article 42 / paragraphs 32, 33: Knowledge of rights

Note: Rights not represented as standalone audit domains remain relevant where a tool's documentation or observable behaviour directly engages them and may be recorded as contextual or cross-cutting findings.

Pillar 2 – AI Governance

Primary basis: EU AI Act

Note: AG1 establishes which AI Act obligations are potentially applicable. AG2–AG6 examine available evidence relating to those obligations.

AG1. Intended purpose, actors, prohibited practices and regulatory classification

Core concerns

- provider's stated intended purpose
- educational context in which the system is intended to operate
- provider/deployer/user roles
- persons affected by its outputs
- whether the use corresponds to an Annex III educational use
- whether the system is potentially high-risk, subject to specific transparency obligations, or otherwise outside those categories
- whether the system is potentially employing manipulative or deceptive techniques, exploitation of vulnerabilities associated with age or disability, or emotion inference

Primary basis

- Article 6: Classification rules for high-risk AI systems
- Annex III (3): High-risk AI systems with regard to education and vocational training
- Article 5: Prohibited AI practices

AG2. Transparency and information provision

Core concerns

- disclosure that AI is being used
- information about capabilities and limitations
- intended and unsuitable uses
- instructions provided to teachers/deployers
- information necessary to interpret outputs appropriately
- identification of AI-generated or manipulated content where applicable

Primary basis

- Article 13: Transparency and provision of information to deployers of high-risk systems
- Article 50: AI generation/interaction transparency disclosures

AG3. Human oversight and user control

Core concerns

- whether meaningful human oversight is enabled
- ability to understand, review and disregard AI outputs
- ability to override or intervene
- communication of appropriate human responsibilities
- design features that may encourage automation bias or excessive reliance
- whether the teacher remains able to exercise meaningful control

Primary basis

- Article 14: Human oversight

AG4. Risk management, accountability and traceability

Core concerns

- evidence of systematic risk identification and mitigation
- testing or evaluation procedures
- documentation of known limitations and risks
- technical/governance documentation where publicly evidenced
- logging or traceability mechanisms
- incident reporting and escalation
- identification of provider responsibility
- evidence of ongoing risk management

Primary basis

- Article 9: Risk management system
- Article 11: Technical documentation
- Article 12: Record keeping
- Article 73: Reporting of serious incidents

AG5. Data governance and non-discrimination

Core concerns

- information about data sources and governance
- data quality and relevance
- discussion of bias and representativeness
- documented testing across relevant populations
- consideration of discriminatory outcomes
- identification of model/data limitations affecting affected groups

Primary basis

- Article 10: Data and data governance

AG6. Accuracy, robustness, cybersecurity and lifecycle monitoring

Core concerns

- documented accuracy and reliability
- robustness to errors or inconsistent inputs
- cybersecurity measures
- known performance limitations
- monitoring after deployment
- communication of system changes
- failure/incident handling
- mechanisms for identifying deterioration or unexpected behaviour

Primary basis

- Article 15: Accuracy, robustness and cybersecurity
- Article 72: Post-market monitoring
